MARWAN KHALIL

mero5601@gmail.com +1-902-388-6540 Charlottetown, PEI

PROFESSIONAL SUMMARY

IT Professional with 6 years of experience supporting and managing enterprise technology environments, with a focus on cloud infrastructure, networking, cybersecurity, and infrastructure operations. Hands-on experience with Azure, SD-WAN, Zero Trust, disaster recovery, business continuity, storage, and infrastructure monitoring. Experienced with Microsoft Entra ID, Intune, Zscaler, Ceph, SAN, Veeam, PRTG, PowerShell, Python, Bicep, and automation. Proven ability to troubleshoot business-critical infrastructure, implement resilient solutions, and collaborate with cross-functional teams to deliver secure, scalable, and reliable technology environments.

SKILLS

Cloud & Architecture: Azure | AWS | VmWare | Vsphere
Networking: SD-WAN | LAN/WAN | VLAN | VPN | Routing & Switching | L3/L7 Firewall
Security & Enterprise: Zscaler | Microsoft Entra ID | Intune | Microsoft 365 | Microsoft Security | Microsoft Purview
Infrastructure: Storage | SAN | Ceph | Veeam | PRTG | Disaster recovery | Incident response
Automation & DevOps: GitHub | Bicep | Python | PowerShell | Automation | JSON
Incident Response: Jira **|** ServiceNow **|** BMCHelix **|** TeamDynamix | Slack

PROFESSIONAL EXPERIENCE

IT Security & Cloud Administrator – Auxly Cannabis Group *(full-time)* *Mar 2025 – Present*

- Administered and managed IT operations, infrastructure, and end-user support for a production environment, ensuring reliable technology services across business operations within SLA.
- Governed Microsoft 365 environment, including **SharePoint**, **Teams**, Exchange and Entra ID.
- Administer **Microsoft Purview**, including sensitivity labels, retention policies, and data loss prevention (**DLP**), to protect data against rising AI & LLM usage within the organization.
- **Led security response** to the organization's growing AI footprint
- **Led AI adoption initiatives** across IT operations, highlighting responsible use while identifying opportunities for positive contribution
- Implemented automated operational process improvements and technical solutions to enhance production efficiency and reduce downtime, by leveraging Excel VBA scripts and RsMulti.
- Supported corporate events, conferences, and company initiatives by managing audio/visual technology, sound systems, presentations, and on-site technical requirements.
- Responded to security and infrastructure incidents by investigating issues, performing root-cause analysis, coordinating remediation efforts, and implementing preventative measures.
- Supported **cybersecurity** initiatives including endpoint protection, security awareness, access controls, vulnerability mitigation, and policy enforcement.
- Partner with business teams and the director level personnel to translate operational needs into digital solutions
- Maintained and improved infrastructure through proactive monitoring, automation, documentation, and vendor collaboration.

Gen AI Training – TELUS International *(contract-based)* *Oct 2025 – Feb 2026*

- Led quality-focused evaluation of AI model outputs, applying analytical frameworks to measure accuracy and consistency.
- Contributed to prompt engineering, hallucination detection, and AI safety/alignment efforts in a fast-paced operational environment

Service Desk Analyst – Buchanan Technologies *(full-time)* *Aug 2024 – Mar 2025*

- Provided Tier 1/2 technical support for Commonwealth Care Alliance (clinical healthcare) and Embry-Riddle Aeronautical University global operations, resolving hardware, software, networking, and access issues while supporting enterprise applications including eCW, Guiding Care, and PanVIVA.
- Selected to support multiple high-priority client teams due to strong technical performance, customer

service, and ability to rapidly adapt to new environments. Successfully operated across various ITSM platforms including BMC Helix, ServiceNow, TeamDynamix, and other enterprise ticketing solutions while maintaining SLA compliance and effective incident management.

- Promoted to on-site depot role; oversaw all equipment processing at Charlottetown branch with minimal supervision, demonstrating reliability and leadership
- Managed incidents through ticketing systems, performed root-cause troubleshooting, escalated complex issues, and maintained high-quality customer service in regulated environments.
- Utilized BMC Helix (Remedy), ServiceNow, TeamDynamix, and other ITSM platforms for incident management and knowledge base documentation
- Delivered Excel/VBA automation projects for internal managers, streamlining reporting and operational tracking

Lab Assistant & Peer Tutor – University of Prince Edward Island*(contract-based)* *Sep 2023 – Feb 2024*

- Ensured lab system availability; provided helpdesk support and tutored students in Calculus and Python programming
- Administered and proctored examinations while ensuring compliance with academic integrity policies.

IT Helpdesk Support – University of Prince Edward Island*(part-time)* *Oct 2020 – Aug 2022 | Cairo, Egypt*

- Managed student onboarding and BYOD enrollment processes, ensuring secure device registration and compliance with campus network access policies
- Administered captive portal WiFi authentication and resolved network connectivity issues across campus, supporting 2,000+ students and staff
- Configured and troubleshot network ports, DHCP, and DNS settings to maintain reliable access in computer labs and campus facilities
- Supported Active Directory account creation, password resets, and access permissions management for new and existing users.

EDUCATION

University of Prince Edward Island – Charlottetown, PEI, Canada

BSc Computer Science | Specialization: Business Analytics

International School of Choueifat - Dubai, UAE
High School Diploma | A-Levels | SAT | IGCSE

CERTIFICATIONS

CompTIA A+
CompTIA IT Operations Specialist
CompTIA Network+
