I am excited to apply to the Technical-Lead Software Development position and would like to present myself as a well-rounded candidate for this position.

With a strong background in software development, IT support, and infrastructure management, I bring a wealth of technical expertise and problem-solving skills that align closely with the role's requirements.

In my current role as a Service Desk Analyst at Buchanan Technologies, I have demonstrated the ability to troubleshoot and resolve technical issues efficiently, manage Active Directory configurations, work with cloud environments such as Azure, and document knowledge bases for effective issue resolution. I was quickly transitioned to a more technical team due to my high performance and efficiency in resolving ticket.

My experience extends beyond IT support into software development and infrastructure management. I have developed automation scripts, front-end applications, and backend solutions using programming languages such as Java, JavaScript, Python, and R. My proficiency in containerization, cloud infrastructure (AWS & Azure), and network management further equips me to handle the complexities of modern software ecosystems.

Key highlights of my expertise include:

- **Software Development & Best Practices:** Strong foundation in coding principles, version control (Git), and continuous integration/deployment (CI/CD) environments.
- **Infrastructure & Security:** Hands-on experience with network infrastructure, routing, DNS, DHCP, VPN configurations, and cybersecurity principles.
- **Cloud Technologies & Automation:** Familiarity with cloud platforms such as AWS and Azure, virtual machines, and containerization solutions.
- **Data Analysis & Visualization:** Experience with R studio,Power BI, RStudio, and Excel automation, which complements system performance monitoring and optimization.
- **Enterprise IT Support:** Exposure to large-scale IT environments through service delivery for organizations such as Commonwealth Care Alliance and Embry-Riddle Aeronautical Universities.

Thank you for your time and consideration. I look forward to hearing back.

Best regards,
Marwan
